

Yellowstone Winter

February 12 - 18, 2018

Explore Yellowstone as few others have... Come experience Yellowstone with Mark Comon from Paul's Photo and Jeff from Nikon in the midst of winter's icy grip. Photograph the wildlife, scenery, and stark environment. Each day we will explore the best spots to photograph Yellowstone's wide variety of flora and fauna and arrive under the "right light" to shoot stunning snowy landscapes.

The Adventure

Join us for an adventure built for photographers by photographers, Mark and Jeff will lead you to the secret places that others just hear about. You will see and capture nature in the best season. Everyone's seen Yellowstone in the summer: Winter's beauty blankets the world in white and offers us a stunning canvas. Our coaches allow for easy "in and out" so we can stop, set-up, shoot and return to the vehicle to change locations in comfort and warmth. Yes, it will be cold, but the photos will be HOT HOT HOT! Sponsored by Nikon- there will be a representative from Nikon with limited loaner gear to try out. Open to all photographers!
