

Garden Foto Fest

Sunday, March 25 2018, South Coast Botanic Garden, 9-4PM

The Event

Join us for a spring day of exploration and creativity through your lens. The Garden Foto Fest Presented by **PAUL'S PHOTO, Creative Photo Academy** and the **South Coast Botanic Garden** Foundation is a fantastic opportunity for photographers of all ages, skill levels, and interests to learn and have fun making pictures!

The South Coast Botanic Garden offers photographers the opportunity to capture gorgeous images of plant and wildlife right here in the city. The Garden also serves as an amazing background to create superb portraits. All photographers are welcome, from the novice who desires to learn the basics to the accomplished shutterbugs who are excited to explore new horizons while focusing on the art and science of outdoor photography.

Garden Foto Fest features hands-on workshops, staffed stations, and dynamic presentations that will not only teach participants the techniques behind stunning outdoor and portrait photography but will also inspire creativity in applying those techniques to each photographer's unique artistic vision. Experts from **PAUL'S PHOTO, Creative Photo Academy** and your favorite photo reps will guide you through the tips and techniques needed to make the pictures you desire. A supply of camera and lenses will be available for you to try and use. Marco and Portrait stations will be available.
